A little about us... and why choose us.

About us...

Reliant Rubber is an award-winning rubber engineering firm that specialises in providing a wide range of rubber flooring and matting solutions.

Our mission is simple yet powerful: we aim to empower the hospitality industry by providing our clients with products designed to enhance safety and comfort for their hotel guests. We achieve this by offering a comprehensive range of non-slip and anti-skid products that prevent accidents and improve the overall comfort of facilities. Moreover, our products help our clients operate more efficiently by protecting floors, reducing housekeeping hours, and minimising floor maintenance costs.

Why choose *Reliant Rubber's* products?

At Reliant Rubber, we uphold three core principles that guide the development of our products:

1. Sustainability: We use a perfectly balanced blend of natural and recycled rubber in the majority of our products, making them an eco-friendly choice. By using more sustainable natural rubber, we lower the demand for synthetic rubber and contribute to reducing the carbon footprint of our industry.

2. Durability: Our products are made of natural rubber, which makes them much more durable than similar products made of synthetic rubber. By ensuring that our products are durable, we further enhance their sustainability, as more durable products require fewer replacements and reduce waste.

3. Affordability: We strive to be accessible to all hotels, regardless of size or ownership. That's why we keep our prices competitive, empowering both independently owned and large hotel chains to benefit from our products.

Reception Area

First Impressions Matter

The first impression that a guest has of a hotel is crucial to their overall experience and how they perceive the establishment. Positive initial interactions can enhance guest satisfaction and loyalty, which ultimately contributes to a favourable brand image. This can give hotels a competitive advantage, influence online reviews and social media presence, and set the tone for a positive customer experience throughout the stay. Therefore, it is essential for hotels to create a warm, comfortable, and welcoming atmosphere right from the start to succeed in a competitive industry.

One way to achieve this is by ensuring that the floors in the reception area are clean, dry, and comfortable. Reliant Rubber provides a range of rubber flooring solutions designed to do just that. The products we display on the following pages will enable any hotel to keep their floors clean and well-maintained. By using professional anti-slip rubber flooring, hotels can improve not only the comfort of their facilities, but more importantly, enhance the safety of the reception area by eliminating the risks of slips, trips, and falls.

Reception Area

Rubber Flooring Solutions:

Squarow Roll

Key benefits:

- high quality rubber,
- ideal for high-foot-traffic areas.

Product dimensions:

7.9m x 1.9m x 12mm

Sustainable choice!

Crafted from a perfectly balanced mix of natural and recycled rubber.

Luggage Storage

Aesthetically pleasing & durable flooring

Luggage storage is a crucial facility for hotels to accommodate guests with varying schedules and enhance their experience. It's an essential service that aligns with the expectations of modern travellers.

Using rubber flooring in luggage storage facilities can have several advantages. First of all rubber flooring is known for its durability and resilience, which allows it to withstand heavy foot traffic. This ensures that the flooring remains in good condition even with frequent use in a luggage storage area. Additionally, the shock absorption qualities of rubber flooring can help protect both the luggage and the flooring from potential damage.

Reliant Rubber offers rubber flooring with a non-slip surface, which contributes to safety in the luggage storage area. Rubber flooring is also easy to clean and maintain. Any spills or dirt from luggage can be easily wiped away, ensuring a clean and hygienic storage area. This is essential for maintaining a positive guest experience and upholding cleanliness standards. Lastly, rubber flooring has sound-absorbing properties that can help reduce noise in the busy luggage storage area.

Luggage Storage

Rubber Flooring Solutions:

Coin rubber flooring

Diamond-checker rubber flooring

5-bar rubber flooring

This product can be cut to size!

Fine-ribbed rubber flooring

Wide-ribbed rubber flooring

*The fine-ribbed rubber flooring is now only available in 10m x 1.22m x 3mm & 10x 1.22m x 5mm rolls. The 1.5m wide rolls are no longer available.

Bar & Kitchen

Prevent spills, slips & combat fatigue

A clean and well-organized bar is crucial for making a good first impression on your customers. Just like a tidy reception area, the appearance of your bar can make or break your business. By using rubber bar mats and shelf liners from Reliant Rubber, you can ensure that your bar area is not only aesthetically pleasing but also safe for your staff.

Our Bar Mats are the perfect accessories for protecting your bar and work surfaces from drink spillages and stains. The spiked rubber design of these mats collects spills and overflows, keeping the bottom of the glass dry and your bar area looking tidy. These mats are easy to clean and are a must-have for any bar or restaurant.

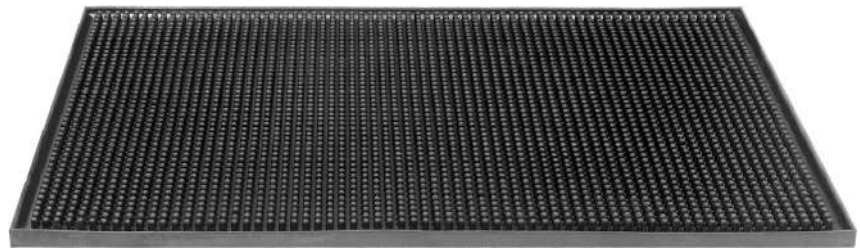

In addition, we highly recommend our anti-fatigue bubble mat for use in kitchen areas and behind bars. This specially designed mat helps to reduce lower leg fatigue and eliminate the associated risks of injury and pain. By introducing these mats, you can significantly improve the working conditions for your chefs and bartenders, which in turn will lead to a happier and more productive workforce.

Bar & Kitchen

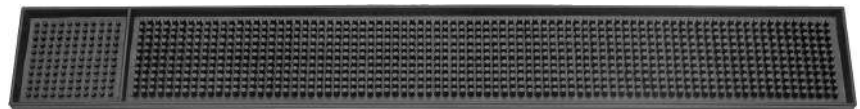

Non-slip & Anti-fatigue Mats:

Gym Facilities

*Provide safe & comfortable
workout experience*

Gym mats are an essential item for any fitness centre, and our solid-top gym mat, checker-top gym mat and tile gym mats could be the perfect solution. They not only provide a stylish look but also offer exceptional durability and easy installation. These mats are designed to absorb shock, reduce damage caused by impact, abrasion, and vibration, and ensure a safe and comfortable workout experience. Additionally, the mats have an excellent anti-slip design, which provides added traction underfoot, allowing gym users to confidently perform their exercises without worrying about slipping or losing their balance. What's more, our mats are excellent at noise absorption and will significantly reduce the amount of noise generated by gym-goers in your hotel.

Gym Facilities

Edges for solid top & checker top mats

Tile Gym Mat;
100cm x 100cm x 14mm
50cm x 50cm x 15mm

Sustainable choice!

Swimming Pool

Barefoot comfort & superior drainage

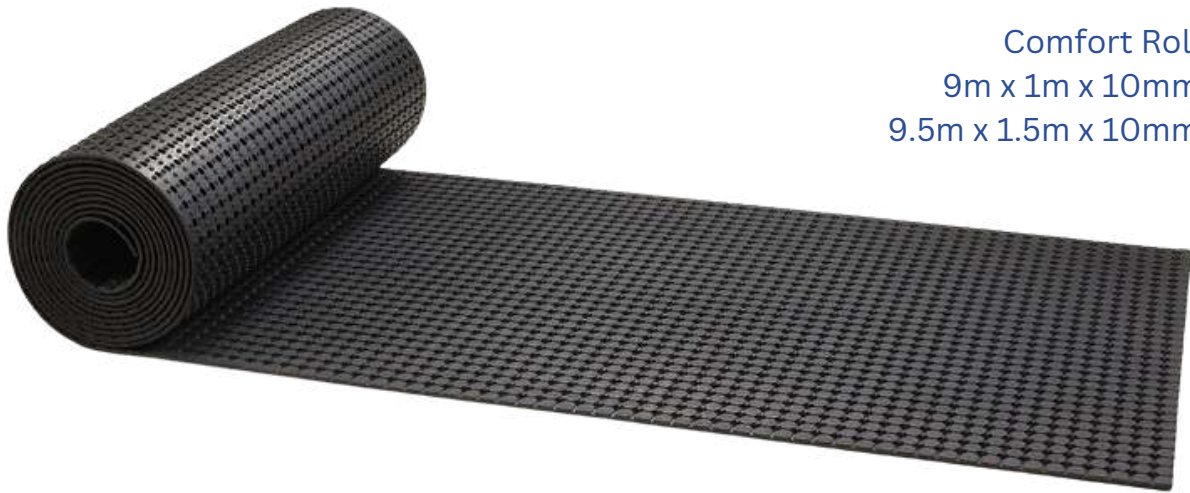

Swimming pools can be slippery, which is why it's essential to take measures to reduce the risk of accidents. Our non-slip comfort rolls, comfort mats, and waves mats are specially designed to provide maximum traction, even in wet environments. These products are ideal for swimming pools and spa areas, as they offer superior drainage and barefoot comfort. The deep patterned surface of the comfort rolls and comfort mats provides excellent traction, and their unique design allows water to flow between the raised pattern, preventing water accumulation. Made from high-quality rubber, the waves mat is incredibly durable and can withstand heavy foot traffic, making it perfect for use in changing rooms. By incorporating these products, you can significantly reduce slip hazards and ensure a safe and secure walking surface around your swimming pool.

No. 1 best sellers!

*(particularly recommended
for use in changing rooms)*

Golf Course

Quality products for premium facilities

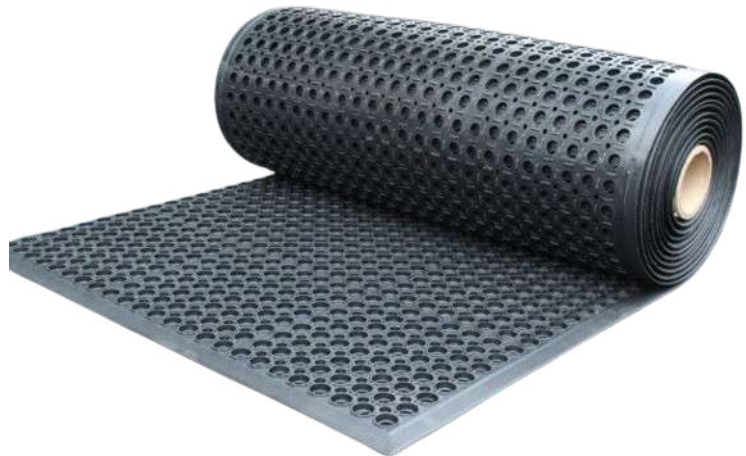

Improve the golfing experience for players and simplify course maintenance with our rubber matting solutions. Our Ramp Roll and O-Ring Grass Roll provide an excellent solution for grass retention and soil erosion control. The anti-slip cellular structure of the O-Ring Grass Roll and Ramp Roll ensures safety and traction on slippery grass and steep paths while also promoting grass penetration and creating a seamless bond with the ground. These mats are easy to install and maintain, and they can withstand all weather conditions. To maintain your golf course, you can simply trim the grass above the mat with a conventional mower. Our innovative natural rubber matting offers the perfect blend of functionality, safety, and aesthetic appeal, taking your outdoor facilities to new heights.

Outdoor Events

From ice-rinks to temporary car parks

Our rubber flooring is a perfect safety measure for any outdoor event, from marquee flooring to temporary car parks, or even ice-rinks. We have helped many businesses to protect their guests from slips, trips, and falls during outdoor weddings, drive-through cinema events, seasonal events such as themed ice rinks, and much more. The rubber flooring we offer for outdoor use is crafted from the toughest natural rubber, making it exceptionally durable, resistant to heavy traffic, and able to withstand any weather. If you're planning an outdoor event and need a flooring solution to provide peace of mind, contact us today, and we will do our best to accommodate your needs.

Sustainable choice!
